

*Jigsaw building for the 21st Century with our virtual jigsaw puzzle for the web or your PC*

- Build jigsaw puzzles on web pages, or on your computer
- Free online Jigsaw game for any website
- Make money selling Jigsaw software to your customers, or create loyalty by giving it to them for free
- Custom made puzzles, branded specially for your site
- Easy intuitive controls

# Entertaining your visitors means they'll return!

Whenever people visit your website, they come for your main content. And, yes, that's what persuaded them to visit... But what will keep them returning again and again? Why, entertaining them, of course! Everybody likes to play, and who hasn't played with, and enjoyed, a jigsaw puzzle. And now, you can offer jigsaw puzzles for your site visitors to play.

## Three flavours of Jigsaw

There are three flavours of our software— a free one, an affordably priced one, and a third that can either make you money, or gain you more loyalty from your customers.

### Jigsaw-for-free

Simply email a digital picture to us and we will drop it into a puzzle for you and send you back files that you can publish on your website. Gratis. Get some quality free entertainment for your customers!

### Jigsaw classic

Email us a picture, we pop it in our software and email it back to you. Buy as many as you want, with discounts for multiple puzzles. Perfect if you want puzzles on multiple pages, or to change the puzzle daily or weekly.

### Jigsaw premium

This is a version of the game that you can sell (or give away) to your own customers. They use the software on their own PC (sorry Mr Jobs, but we don't have an Apple flavour) and can use it to create endless jigsaw puzzles from any digital pictures they own.

# What's on the menu ?

Let's look at each of the three flavours, starting with the free one.

## Jigsaw-for-free

So you'd like a free jigsaw game for your website. Cool, because we want to give you one. It's easy and fast to do, and it's a doddle to publish. You don't have to be a rocket scientist – it's just a cut and paste thing.

So how do you get your shiny bright new webtoy ? Just email us. Your name, your email address and your website address is all we need. And YOU get to decide what picture you want in your puzzle. Just send us the image and we'll speed the puzzle back to your inbox.

And yes, it really is free. The only conditions are

- You can only have one
- You must be entitled to publish the image (copyrights etc)
- If we judge your image unsuitable, we can refuse it without giving a reason. You can submit an alternate image if you wish.
- You are responsible for publishing it to your site (though we will answer questions by email if you struggle).
- The game contains a 'percentage loader' screen. This short startup screen tells people who wrote the software (us !).

That's the short, plain English version. You can read the full Terms and Conditions on the website. See the T+C's, and apply for the free game at

[www.quizengine.co.uk/jigsaws](http://www.quizengine.co.uk/jigsaws)

See you there !

# What's on the menu ?

A delicious and very affordable treat. Fill your website with as many as you want.

## Jigsaw classic

The only problem with the free jigsaw puzzle is you can only have one. If you want multiple puzzles on different pages of your web, or if you want to change your puzzle, daily or weekly, then you'll need Jigsaw classic.

Again, you select the image you want to use and email it to us. We pack it into our software and mail it back. You just cut and paste it into your webpage. Easy peasy...

And it really is very reasonably priced. Prices for a single game start from £32. There are no time limits, or games played limits either. Buy it once, use it forever.

Prices get even better when you buy in bulk (costs below) – as low as £22 per puzzle. If you publish a jigsaw for your visitors to play, they would get bored if it never changed. But put a new one online each day, or each week, and you're giving people a reason to repeat visit.

Lastly, you can, for a one time fee, have a custom 'template' made for a jigsaw. This shell can be made to match the style of your own site. Logos, fonts, buttons, colours – all made to make the puzzle gel perfectly with your site design.

Every puzzle we make for you is then beautifully branded, but you only pay the 'reasonable' prices for them. Sweet !

| Quantity | Unit cost |
|----------|-----------|
| 01-10    | £32.00    |
| 11-20    | £28.00    |
| 20-50    | £25.00    |
| 51+      | £22.00    |

|   | One time cost |
|---|---------------|
| Redesign of puzzle 'shell' to match your site | £420.00       |

# What's on the menu ?

Our premium offering is going to delight your customers...

## Jigsaw premium

Now this is a bit different. This is not a game to be played on your website. This is software that your customers have on their own PC and play on their desktop. The special thing is *a jigsaw can be made from any digital picture or downloaded image they have*. This is an endless, funfilled game for kids and grown ups, and no one ever has a puzzle with missing pieces !

Now here's the good part for you. You pay us a single fee for the software, and you can re-sell it to as many customers as you want. Yes, we're serious. Pay for it once, sell it forever. Do the sums right... *this software will make you money !*

Sell it for £100, sell it for a penny – your choice. You could give it away for free. Why not do an 'added value' deal with your existing inventory? Buy this product, get this software free... But hey, you know your own customers. We're sure you'll figure what's right for them.

Thrown in with this software is customisation. *You decide what the puzzle looks like – colours, buttons, fonts etc.* In other words it's beautifully branded for your business. You also get a 'splash' screen – a picture that appears as the software loads – that advertises your site or products. Just tell us what you want it to look like, and what it should say.

Jigsaw premium costs £2750. And remember... you can do any and all of these things forever, with just that single purchase.

# Terms and Conditions

## Jigsaw-for-free

You may only apply for a single free jigsaw for a single web domain. If you own multiple domain names, you may apply for a single jigsaw for each domain.

The image you supply must either be a) out of copyright, b) your own picture or c) one where you have the permission of the copyright holder to use the image on your website.

We reserve the right not to create a jigsaw game where we consider the image to be unsuitable. This is at our discretion and we don't need to offer a reason for rejection. You may offer an alternate image if you wish.

The final image size will be 496 x 396 pixels and the overall size of the game will be 800 x 600 pixels.

We suggest you prepare your image at 496 x 396 resolution. We will accept images at other resolutions, but you will need to accept our cropping / resizing decisions. If you send us an image at 496 x 396, you know how it's going to look !

The image format we would prefer is .png as this ensures the highest quality in the finished jigsaw. If you cannot supply in .png, we can accept pretty much any other image format.

You will receive an email with an .html page, a .swf file (the actual game) that will allow you to publish the game on your website.

You are responsible for getting the game to work on your website. We can offer advice and guidance, but cannot promise to resolve all problems.

You may publish the game on as many pages on your site as you wish. There are no restrictions on how long you may use it, and no restrictions on how many games are played.

The game may take a few seconds to load into a browser. During this time there is a 'percentage loaded' screen showing. This screen also tells your visitor who wrote the software (us!).

The address to apply for a free jigsaw game is [www.quizengine.co.uk/jigsaws](http://www.quizengine.co.uk/jigsaws)

We reserve the right to withdraw this free offer at any time.

The game may take a few seconds to load into a browser. During this time there is a 'percentage loaded' screen showing. This screen also tells your visitor who wrote the software (us!).

For orders totalling £200 Sterling or less, payment must be made immediately on receipt of your games. For orders totalling between £200 and £600, you have 14 days in which to settle the bill. Orders over £600 have 30 days to pay.

International (outside of the United Kingdom) orders must be settled using Paypal. **You must have a Paypal account to trade with us.** Paying this way does not cost you any extra. Get a free account at [www.paypal.com](http://www.paypal.com)

UK customers may settle their bills in one of several ways.

- Paypal
- Personal or Business cheque
- B.A.C.S.

# Terms and Conditions

## Jigsaw premium

Jigsaw premium is a piece of software that runs on a person's PC, and not on a website. It allows them to load a digital image into the software, and create and play a jigsaw puzzle created from that image.

Before placing to an order, we recommend that you view examples of how Jigsaw premium works. Send an email to [premiumtest@quizengine.co.uk](mailto:premiumtest@quizengine.co.uk) and we will mail you examples back.

Our software is tested to work on the following operating systems. We do not warrant that our software will work on any other operating systems, including any newer or updated versions of these operating systems.

- Windows XP
- Windows Vista
- Windows 7

As there are countless PC configurations in the world, we cannot warrant that this software will work on any single individual's computer. We cannot accept liability if any individual's computer will not play the software.

The dimensions of the software are as follows :

Overall dimensions : 800 x 600 pixels  
Jigsaw Image size : 496 x 396 pixels

During development, test versions will be watermarked with the words 'sample - not for release'. When you are happy with the finished design, and confirm so by email, we will remove the watermark and deliver the finished version.

We will deliver the software as 'object code' - a compiled .exe program, along with user documentation. You do not get the 'source code' for the software.

You are authorised to distribute the finished game to whomever you wish. You may charge a fee, or give the game away as you see fit.

There are no time limitations on the software.

If we have not traded with you before, we require a £250 deposit before starting work. The remainder of you bill must be settled within 30 days of taking delivery of the completed game.

International (outside of the United Kingdom) orders must be settled using Paypal. **You must have a Paypal account to trade with us.** Paying this way does not cost you any extra. Get a free account at [www.paypal.com](http://www.paypal.com)
